

BMI SYSTEM[®]

Global transparency Reporting Workshop

8th Annual Forum on Transparency & Aggregate Spend, Washington

BMI SYSTEM is certified to ISO 9001:2008 standard for its software development and healthcare industry services activities.

“Real time” Polling session

1. Is your organization a:

- Pharmaceutical company
- Medical device company
- Both a pharmaceutical and medical device company
- Other

2. What is your involvement in your company’s aggregate spend program?

- US (State and Federal) transparency only
- International transparency only
- Both US and international transparency
- I’m not currently involved in my company’s aggregate spend program

3. How familiar are you with international transparency regulations?

- Not at all familiar
- I am aware of which countries have regulations, but not of the requirements
- I have a general understanding of what is required by international transparency regulations
- I have a detailed, country-level understanding of international transparency regulations

“Real time” Polling session

4. How familiar do you feel your compliance/transparency organization as a whole is with international transparency regulations?

- Not at all familiar
- Aware of which countries have regulations, but not of the requirements
- Has a general understanding of what is required by international transparency regulations
- Has a detailed, country-level understanding of international transparency regulations

5. What is your own top learning goal for today’s session?

- Understanding detailed information about international transparency regulations
- Understanding what types of solutions are available to manage international transparency needs
- Learning about how pharma and device companies typically structure their international transparency program
- Other

“Real time” Polling session

6. What type of system is your organization currently using to manage international disclosure?

- The same system that my company uses for US disclosure
- International disclosure is managed in one system, but not the system used for US disclosure
- There are multiple systems being used across different non-US countries
- International disclosure is managed manually

7. Is the ultimate responsibility for filing international disclosure reports:

- With your worldwide headquarters
- With each individual country
- With the US, but the US isn't where my company is headquartered
- Other

8. How does your organization capture data on cross-country HCP engagements (e.g. the US has a French doctor on a US Advisory Board)

- My company's aggregate spend system automatically captures this with no additional effort
- I have to enter this engagement into a separate system for international reporting
- Manually
- Other
